## *Federal Condition Codes*

### *What is a "Federal Condition Code"?*

This is a two character combination of the "Supply" condition code and the "Disposal" condition code. The Supply condition code is assigned by the activity turning the property in to the DRMO/DRMS. ***Supply condition codes*** are always the first position of the Federal code and are defined as follows:

#### ***A - Serviceable - Issuable without Qualification***

New, used, repaired, or reconditioned material which is serviceable and issuable to all customers without limitation or restrictions. Includes material with more than 6 months shelf life remaining.

#### ***B - Serviceable - Issuable with Qualification***

New, used, repaired, or reconditioned material which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes material with 3 through 6 months shelf life.

#### ***C - Serviceable - Priority Issue***

Items which are serviceable and issuable to selected customers, but which must be issued before Condition A
